

Today's youth love technology and need an innovative learning environment. Computers are an integral part of their lives, so it makes sense to put this familiar technology to work in a learning environment. Now synergistically

combine that technology with a one student/one tutor approach to learning and you have Socratic Learning Systems. We help a student reawaken the natural curiosity that

is needed to overcome academic challenges and prepare for the job marketplace of the 21st Century.

What are others saying about the system?

Dallas Morning News... *Socratic Learning Systems makes so much sense and has the potential to do so much good for so many young people around the country: online tutors. Think of it as the natural intersection of technology and education.*

CNN... *Socrates is going contemporary*

Chicago Tribune... *Schools raise bar on course standards...students take more advanced courses in English, math, science and social studies.*

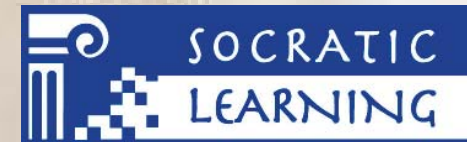

San Jose News... *poised to interact with technology in the next three years or so...their product itself was so impressive... their idea is sure to inspire others in the industry to pursue similar goals.*

USA Today... *Socratic approach is a concept with promise...a product...that's demonstrably good*

Combine the wisdom of Socrates with cutting-edge technology.

How is Socratic Learning helping create the 21st Century learning environment?

- Students no longer feel lost or left behind, they work at their own pace.
 - Tutors use electronic whiteboards to guide the student through the sequential steps to internalizing the information.
 - Students learn through inquiry, receiving immediate, positive feedback.
 - With each success, self-esteem is nurtured and a newfound appreciation for learning encouraged.
- How does an ancient Greek philosopher from the fifth century B.C. impact our 21st century approach to education?
- Socrates was a teacher and an iconoclast; he dared to question the status quo.
 - He taught by asking questions, building one question upon another until the truth emerged.
 - Greek youth idolized this fifth century B.C. "rock star" and his new world of thought.
 - Once considered radical is now the cornerstone of modern education.
- The wisdom of the ages married to the technology of today.

Today's technology? What kind of equipment is needed?

- No special equipment is required, all you need is a computer and access to the Internet.
- Lesson plans are individually developed based on an in-depth assessment.
- Socratic Learning presents materials in a personalized, incisive, and relevant way.
- A Socratic tutor is only a click away.

You say, "a click away," how and when is this program accessible?

- Assistance for all academic and some vocational subjects is available when it is most convenient.
- Sessions could mesh with already existing lessons or self-directed study.
- A small investment in time can advance a student a full grade level.

How do classroom teachers feel about sharing their class with 'cyber tutors'?

- Teachers want to give all the students the attention they need and deserve.
- The teacher is the "coach" in the Socratic Learning classroom.
- Highly qualified college degreed tutors provide positive one-on-one instruction.
- The "coach" receives session progress reports and future session schedules.
- Teachers are now free to stimulate and hold the interest of all the students.

What do participating teachers have to say about their experience?

Classroom teachers welcome the support of Socratic tutors.

- Ms. Amber of Plano Independent Schools, who teaches students who have been identified as needing extra help in math, gives Socratic Learning high marks. "Teachers can't be everywhere in a classroom at once to see if someone's made a mistake or is struggling. You can't catch every single one, every single time."

- Ms. Warren states that we "are the best tutorial service" that she has "experienced in my ten years of teaching in the Chicago Public Schools".

This program sounds great, but what kind of 'on the ground and in the classroom' results have there been?

Educators give Socratic Learning Systems an A+:

- In New York City, four (4) of the most challenged elementary schools were used to measure the effectiveness of Socratic remedial tutoring. On the Regent A Math Test, these four schools achieved #'s 1, 2, 4, and 8 in performance.
- In Gary, Indiana, math scores were raised by 68 % after only 25 hours of tutoring and English scores increased by 58%.
 - In Texas: Test scores increased an average of 74% when Socratic Learning partnered with Public Schools by adding our technology and expertise.

What about the "No Child Left Behind" program, does it apply?

- Socratic Learning satisfies the strict quality and academic state standards.
- Nationwide, Socratic Learning has been already successfully implemented.
- If your school district qualifies, Socratic Learning is prepared to assist you with the resources needed to begin your new learning program.

May parents become involved ?

- Socratic Learning encourages parents to become a partner in their child's education. Parents are able to follow their child's progress.
- We supply a solution to busy schedules and lack of training.
- Parents can log on to watch a student's tutoring session in real time.
- All sessions are archived and available for review at a later time.
